Our GT Casino comes fully equipped to launch your online casino. **The latest games, advanced bonus engines, and tournaments** are packed alongside our heavy-hitting features that are sure to impress your new customers.

INTRODUCTION

- ♦ **Always New Games**

New games become immediately available to our partner. The partner can change game banners, game announcements, game order, and priority of display for an end user, as well as disable any games at their discretion.

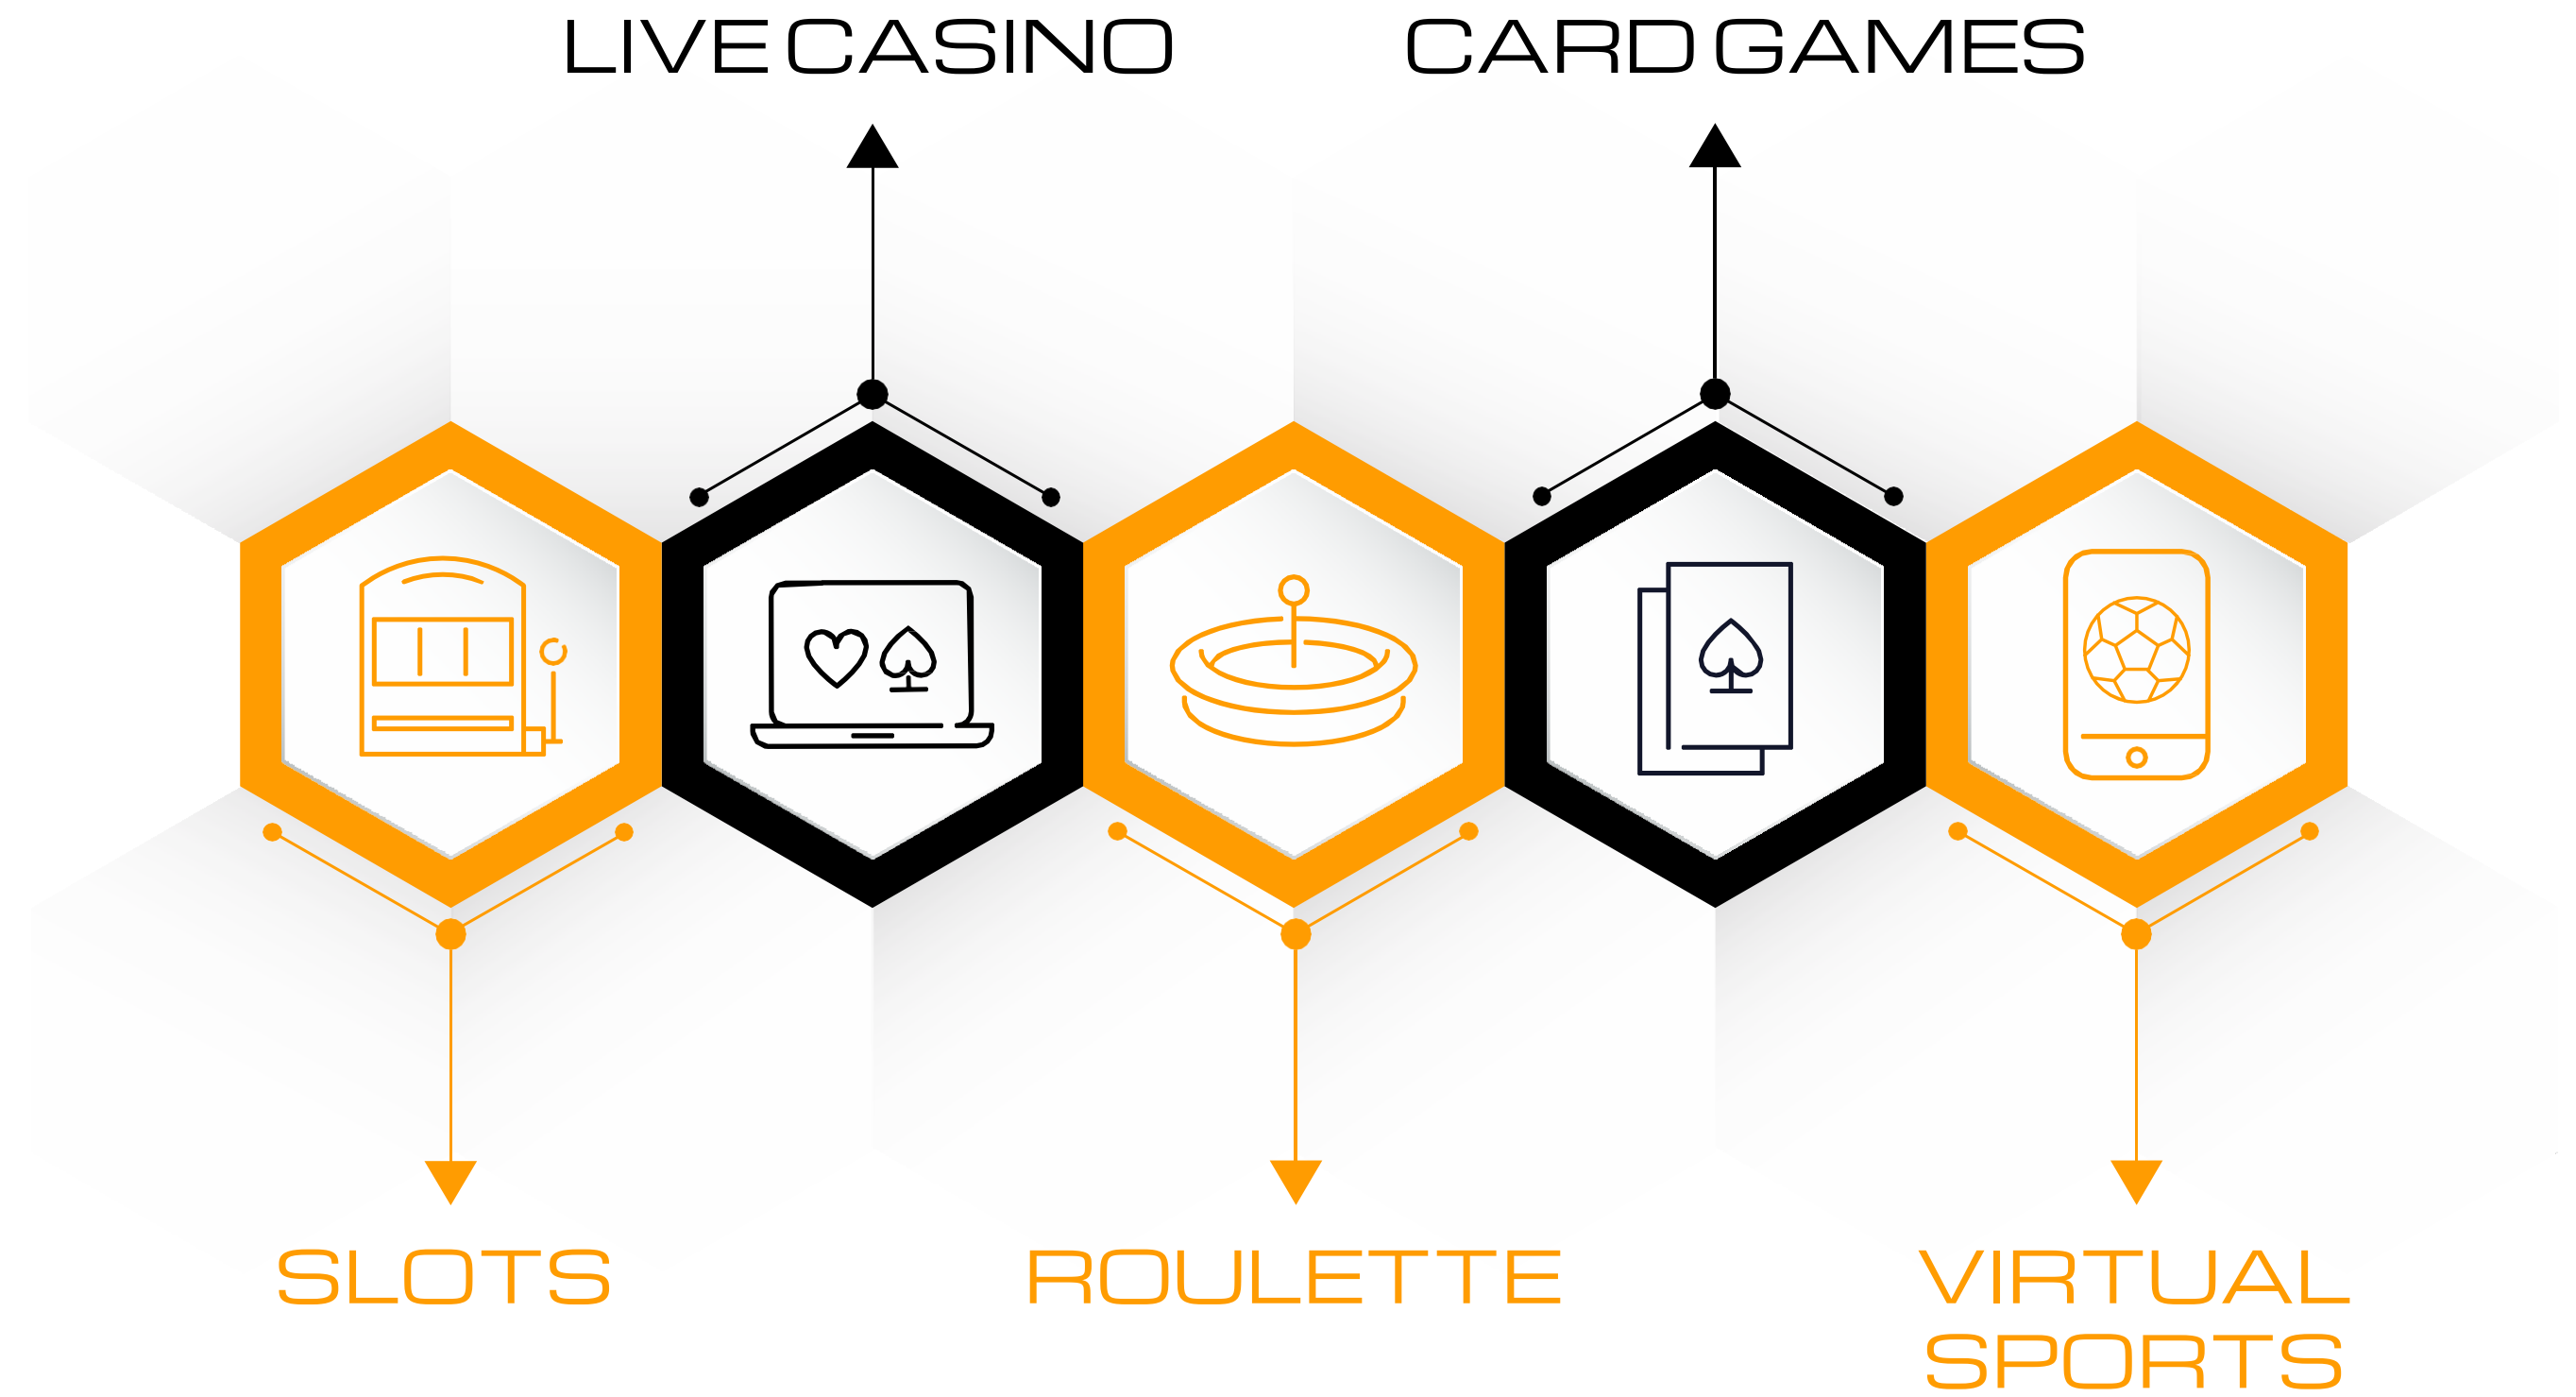

- ♦ **Advanced Bonus Engine**

Gamingtec support team either adjusts the bonus system for a partner or can teach the partner how to do it by themselves. Free bet, free spin — bets without money to attract new players.

- ♦ **Tournaments**

Tempt your players to play more and hold tournaments on their own tailored strategy! Tournaments can be fun and rewarding! And they don't necessarily reward those who spend the most.

The primary objective of Gamingtec is **to offer a cost-effective and high-quality turnkey solutions by combining the management team expertise with robust platform and high-quality products.**

- **We offer more than software**

Our platform is modular and each product is managed by a dedicated team of experts in their respective area - CORE, Sportsbook, Casino, Payments and Affiliate Platform -. We can offer a complete iGaming experience where the partner can choose our full bespoke front-end or build their own, can decide between industry leading sportsbook iframes or a fully customized GT frame on the API of choice, and choose between having own 3rd party agreements versus GT deals. Flexibility and customization are what defines us.

Why choose Gamingtec?

- ◆ **Aggregation and gamification**

All platform modules outside CORE are based on content aggregation from the most popular providers in the industry. The variety in sportsbook offering, casino games or payment methods is only matched by our means to enhance the content value.

- ◆ **We have partners, not clients**

The principle of revenue sharing sets the base for every partnership we go into. Sharing benefits means sharing risks hence a common goal to keep a top quality standard in our products and services we deliver to our partners in all aspects of the business.
